

PROLIFE FACTS

How things have changed at Planned Parenthood, America's largest abortion provider. Planned Parenthood in the 1950s promoted birth control only. A reader of LifeSite News discovered two Planned Parenthood pamphlets from 1952 answering a question about abortion:

Q: "Is abortion birth control?"

A: "Definitely not. An abortion requires an operation. It kills the life of a baby after it has begun. It is dangerous to your life and health. It may make you sterile, so that when you want children, you can't have them. Birth control merely postpones the beginning of life, abortion kills life."

Now, Planned Parenthood promotes abortion as a "termination of pregnancy" and "one of the safest medical procedures you can get". CNSNews reported that in the year ended June 2015, Planned Parenthood clinics performed 324,000 abortions and the organisation received US\$ 553 million in Government payments. How many of those women would have gone through with their abortions if the original advice and language still stood? **For more pro-life information, visit www.voiceforlife.org.nz or phone (09)4430995.**
